Panasonic Unveils "3D your world" at IFA 2010

Panasonic Corporation unveiled its exciting range of industry-leading 2D and 3D products at the IFA, Europe's leading consumer electronics fair from September 3-8 in Berlin. Coining this year's theme as "3D your world," Panasonic expanded its 3D offerings by presenting the world's first consumer 3D camcorder - the SDT-750 - which allows consumers to shoot their own 3D content. Available video includes general visuals of the products on display at the IFA.
